

# Top 10 Reasons to use PaperCut MF

## 5 Monitor and Report on Usage

Real-time monitoring and reports address all areas of print/copy/fax/scan management, ranging from detailed page logs to summaries by user, department, device or environmental impact. PaperCut MF offers more than 50 reports out of the box, in PDF, HTML or Microsoft Excel (.csv) format. Access reports from any web browser, or schedule them to be automatically generated and emailed. You can set up reports to use your own header, and create reports with custom data by specifying date ranges, filtering and sorting by the data available.

## 6 Deploy Simply

An installation wizard installs server software and then proceeds to automatically detect printers and multi-function devices on your network. Create users and groups automatically from directory services including Active Directory, Open Directory, Novell eDirectory or LDAP. Install wizards help you define user access rights, page costs and quotas. Client software is optional and can be run directly off a server share avoiding the need to install/deploy locally.

PaperCut MF integrates with printers and multi-function devices from all major vendors.

## 7 Administer Centrally, Manage Easily

PaperCut MF provides browser-based administration access from any network location, providing advanced administration and configuration options in an intuitive user interface.

End users have access to a set of web tools to track their own activity in real-time, query their account balances, view transactions, and transfer credit to other users.

## 8 Integrate with Your Intranet and Other Systems

A customizable web interface ensures you can easily integrate with your intranet site, and a fully documented API and scripting interface let you integrate PaperCut MF with other IT systems.

## 9 Scale Up Effortlessly

Modern software design and architecture provides scalability for networks of all sizes, from five to 500,000 users. Regardless of the number of servers and end users on your network, PaperCut MF will meet your needs.

## 10 Maximize Uptime and Availability

PaperCut MF delivers a robust approach to maintaining service by clustering at the print spooler, application server and database (for cluster-aware databases), as well as automatic fail-over protection against single points of failure.

PaperCut is used by more than 50,000 organizations in 100+ countries to cut costs and environmental impact.
